Harminder Singh Saini

Senior Full Stack Developer

Surrey, BC, Canada | +1 778 956 7035 | harminder.saini111@gmail.com

SUMMARY

Senior Full Stack Developer with 7 years designing and delivering scalable applications. Currently building the EPASS ERP at Fullsteam, including an Azure OpenAI powered natural-language search, Lit-based reporting dashboards, and production payment gateway integration. Backend: .NET/C#, Python, Java, Node.js, GraphQL, EF Core, secure RESTful APIs and serverless. Frontend: React, Angular, Lit, TypeScript, JavaScript. Databases: SQL Server, MongoDB. Cloud: Azure, AWS (Lambda, serverless). Agile, Docker, CI/CD.

EXPERIENCE

Senior Full Stack Developer, Fullsteam

Surrey, BC | Jun 2025 - Present

- Developed an Azure OpenAI powered natural-language search for an enterprise ERP (EPASS), translating user queries into structured JSON filters to retrieve live product, inventory, pricing, and sales data.
- Designed a secure, extensible AI query architecture with .NET, GraphQL, and EF Core that enforces query validation and controlled database access, with planned expansion across ERP modules using RAG and semantic search.
- Implemented and moved into production an accounts receivable (AR) payment flow that lets users pay through a generated link, spanning the UI, an authentication API layer, Fullsteam's in-house payment gateway API, and database updates that trigger native payment notification services.
- Built the dashboard infrastructure in Lit and partnered with product managers and developers to deliver optimized EPASS Reports dashboards and widgets across domains, surfacing salesperson activity, products sold by last quarter, last year, or custom date range, and company-level sales performance.
- Collaborated on researching and building the next-generation web-based EPASS ERP: a UI layer with a service layer for each module that calls an aggregator middle tier, which queries the database and returns results.

Full Stack Developer, E One Moli Energy (Canada) Limited

Maple Ridge, BC | Mar 2022 - May 2025

- Upgraded a legacy desktop application from .NET Framework 4.7.2 to .NET 8.0, including a class library refactor, optimized SQL Server interactions, and breaking-change fixes, achieving 30% faster execution.
- Migrated a production application from VB.NET datasets to C# Lists using OOP and LINQ, improving query performance by 30% and reducing memory usage by 20%.
- Led migration of an internal web application from KnockoutJS/jQuery to a React-based MVC architecture, improving component efficiency by 30% and site performance by 40%.
- Built a real-time data visualization application with Python, FastAPI, Dash, and SQL Server to display live sensor temperature and pressure data with Plotly charts.
- Partnered with scientists to build a Python predictive microservice (Scikit-learn, XGBoost) forecasting battery cell self-discharge trends.
- Developed a secure web application with Node.js, React, and JavaScript for fast terminal data retrieval, using OAuth and Docker, delivering a 30% performance improvement and faster deployments.

IT Support Assistant, Douglas College

New Westminster, BC | Sep 2020 - May 2021

- Built a Scrapy web crawler that detects dead links on the college website, reducing manual effort by 50%.
- Developed a mentor-mentee registration application with Power Automate and SharePoint in an Agile team, increasing efficiency by 40%.
- Built a Node.js, React, and MongoDB hostel management application serving 1,000+ users.
- Provided production support, achieving 20% faster ticket resolution.

System Engineer, SAP ABAP, Tata Consultancy Services
Ahmedabad, India | Jan 2018 - Jul 2019

- Developed SAP ABAP/4 solutions for MM, SD, and HR modules in an Agile Scrum team, implementing BADIs and screen, menu, and function module exits on an Oracle backend, reducing downtime by 30%.

SKILLS

Programming: .NET, C#, Java, Python, JavaScript, TypeScript, HTML

Web and Frameworks: React, Angular, Lit, Tailwind, Entity Framework, EF Core, JSON

AI: Azure OpenAI, natural-language (NLP) search, RAG & semantic search (in development)

APIs and Architecture: REST APIs, GraphQL, Microservices, MVC, Payment Gateway Integration, Scalability

Databases: SQL Server, MySQL, PostgreSQL, MongoDB

Cloud and DevOps: Azure DevOps, Azure Logic Apps, AWS Lambda, AWS S3, Amazon Lex, Docker, CI/CD

Practices: Agile

EDUCATION

Post-Baccalaureate Diploma in Computing Studies and Information Systems, Douglas College, New Westminster, BC (GPA 3.20)

B.Tech, Computer Science and Engineering, Guru Nanak Dev University, Amritsar, India (GPA 7.77)

PERSONAL PROJECTS

- **Portfolio:** React, Framer Motion, and Tailwind; CI/CD with GitHub and Vercel.
- **Blog:** React and Tailwind with an Appwrite backend (database and authentication); CI/CD with GitHub Actions and Vercel.
- **Todo:** React and Redux with local storage persistence; CI/CD with GitHub and Vercel.
